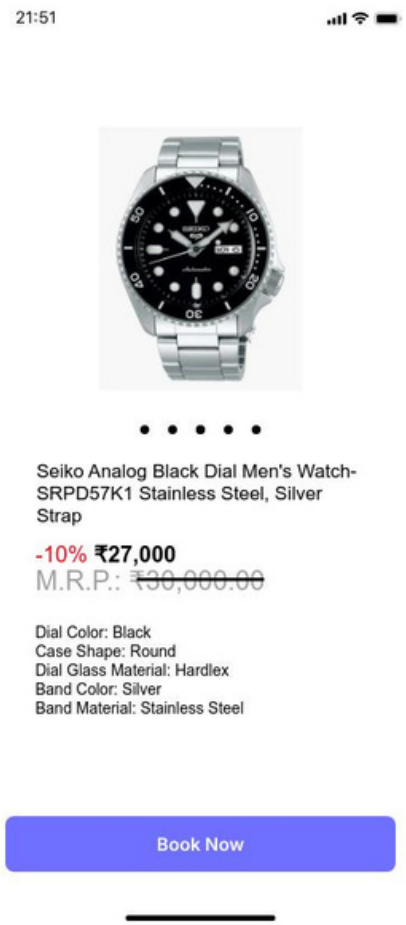
Experiment-7 (Updated - Comfi UI)

Name:HASHA P Rollno:240701187

Experiment with UI design screens and gather user feedback based on updated Comfi application screenshots.

7 White Theme (Light Mode UI)

· This screen uses a white background, providing a clean and simple interface
· It is best for users in ***bright environments or daytime usage***
· Improves readability and clarity of text and UI elements
· Gives a professional and minimal design feel
· Suitable for ***students, office users, and general everyday use***
· Makes content more visible and easy to understand



Black Theme (Dark Mode UI)

· This screen uses a black background, giving a modern and premium look
· It is ideal for users who prefer ***low-light environments***, especially during night usage
· Reduces eye strain compared to bright screens
· Helps improve focus by minimizing visual distractions
· Suitable for ***tech-savvy users, gamers, and night-time users***
· Also saves battery on OLED screens

Grey Theme (Neutral Mode UI)

· This screen uses a grey background, offering a balanced visual experience
· It reduces harsh contrast compared to pure black or white
· Provides a ***comfortable viewing experience for long usage***
· Helps maintain focus without causing eye fatigue
· Suitable for ***users who prefer a neutral and less intense interface***
· Often used in modern apps for a subtle and elegant design

User Feedback Collection

A Google Form was created to collect user feedback on the chat app design. The form was shared with users to evaluate different color themes and layouts. Users were asked to give their rating on visual appeal, readability, and overall experience.
